STATINTL

6 September 1967

NOTE FOR: 

Bill:

1. Reference our telephone conversation this afternoon, attached is the letter from NASA to the DD/S&T and a list of FMSAC publications released to Floyd Sweet, NASA, since 1 January 1967. There may be some earlier FMSAC publications also bearing on the problem which you might include.

2. We are specifically requesting that FMSAC note the NASA memo and indicate by specific referral to appropriate sections of reports the information which might answer NASA's query. Dr. Lauderdale hopes to send a written reply by the middle of next week. He finds this feasible rather than to undertake an elaborate response to the broad questions raised by NASA in their letter.
